# SANIXHOME

## Sanitize your home 24/7

TONALI E.A. proposes a sanitizing system for the air inside homes: living room, dining room, kitchen, bathrooms, bedrooms. Based on an innovative, patented technology, it uses an innovative method for sanitizing the air with particular attention to the safety of people, avoiding the use of violet and UV wavelengths, which are harmful to health.

This echnology has obtained CERTIFICATIONS issued by the most important Italian and European laboratories for the killing of:

- VIRUS: family of Coronaviruses which include viruses such as SARS-CoV and SARS-CoV-2 (COVID-19)

- BACTERIA
- NOx (nitrogen oxides)
- VOC (Volatile Organic Compounds) such as formaldehyde

Gloves, masks, spacing and hand sanitization. But the doubt remains: are there viruses, bacteria, pollution, bad smells in the air we breathe inside the house?

The SANIXHOME system proposed by TONALI E.A. allows the **killing of viruses, bacteria and pollution**. Once placed in the house, the filter **sanitizes the room air**. Harmful organic substances and those responsible for bad odors decompose. Bacteria, viruses and fungi that attack surfaces are killed thanks to the strong oxidizing power of the photocatalyst activated by artificial visible light.

### CLEAN AIR TO BREATHE 24/7

The spectrum of light used has been studied with **particular attention to the safety of people,** activating even without the aid of violet (400nm) and UV wavelengths, which are harmful to health.

### THE TECHNOLOGY

First stage of G4 filtration capable of retaining 100% PM10 and 40% PM2.5. Triple filtration stage through microporous ceramic modules. The technology uses doped titanium dioxide (TiO2) which is activated by light generated by a special LED board calibrated on a specific wavelength which triggers oxidative photocatalysis. The spectrum of light used has been studied with particular attention to people's safety, activating without the aid of violet (400nm) and UV wavelengths, which are harmful to health..

Power of the system	13W ±5%	IP Grade	IP20
Rated air flow	22 m3/h	Level of electrical protection	11
Total acoustic noise	10dB(A)	Chassis	Plexiglass
Rated voltage	12V DC	Colour	Bianco
Rated current	0.07A	Sizes	L 26,2 x Ø 11,5 cm
Frequency	50/60Hz	Weight	0,950 Kg
Power factor	> 0.95		

#### INSTALLATION AND MAINTENANCE

SANIXHOME does not need assembly. A 220V socket in which to insert the power supply is enough. The product requires simple and periodic maintenance: cleaning of the prefilter by washing with warm water every 6 months and of the three ceramic filters by washing with hot water at 80 ° C every 12 months or oven at 350 ° C for 20 minutes.
